

**Daniel and Manuel visited María Oliveira
and her family-owned brick factory.**

They first mold the bricks with this old machine, they dry them on shelves, and then bake them in their ovens.

They were hoping to get a better machine,
but getting an \$8,000 business loan is very difficult.

KAZ 653

**After the bricks are baked, they acquire their red colour.
At the time of the visit one brick cost 600 Gs = \$0.12 CAD**

Manuel and Daniel also visited Juan Barrios and his family
at their own electronics repair shop.

Juan is also a singer-songwriter of Paraguayan Christian folk music.
